The background of the cover is a detailed black and white illustration of various agricultural products. At the top, there are several long, slender bean pods, some open to show the seeds inside. Below the beans, on the left, are three round radishes with their leafy tops. In the center, a large ear of corn with its husk partially removed is shown diagonally. To the right of the corn are several large, crinkled leaves, likely from a cabbage or lettuce. In the bottom left corner, there is a large, round tomato. The entire scene is set against a dark, textured background.

The Priceless Ingredient and Archias' "Sure Seeds"

In the city of Bagdad lived Hakeem, the Wise One. There came to him—one day—a young man, who had spent much but got little, and said: "Tell me, Wise One, what shall I do to receive the most for that which I spend?"

Hakeem answered, "A thing that is bought or sold has no value unless it contains that which cannot be bought or sold. Look for the 'Priceless Ingredient.'"

But what is the Priceless Ingredient? Spoke then the Wise One: "My son, the Priceless

Ingredient of every product in the market is the Honor and Integrity of him who makes it. Consider his name before you buy."

And so it is with Seeds. Archias' "Sure Seeds", Bulbs and Plants are Tested for germination and purity and are backed by almost a half century of experience in growing and careful selection for quality and productiveness. Archias' products do contain the Priceless Ingredient.

Our interest in your success is not ended when your order is filled correctly but we have been interested in it for years, and will be interested in the crops you obtain from our seeds this year.

We have taken every precaution to see that the seeds you purchase this year will make successful crops as far as it is within our power, because we realize that your future orders depend to a large extent upon the care we have taken in selecting your seeds.

Archias' Seed Store wants your business this year and your good will for future business and we feel that our efforts will assist you in raising better crops and give you a feeling of good will toward Archias'.

Archias' Gilt Edge Warranty Your Protection

Upon receipt of our seeds, examine them, test them in any way you wish and if found unsatisfactory return in ten days and money will be refunded. We give no warranty, express or implied, as to the description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out. If the purchaser does not accept the goods on these terms, they are to be returned at once.

NITRAGIN

on Clover

(Medicago Sativa)

"There is no state in the Union in which Alfalfa cannot be successfully grown."

Alfalfa produces 3 to 7 tons of hay to the acre.

"Its long, branching roots penetrate far down, and thus constitute a gigantic subsoiler. These become an immense magazine of fertility. As soon as cut they begin to decay and liberate the vast reservoir of fertilizing matter below the plow, to be drawn upon by other crops for years to come."

Prepare the land thoroughly and sow seed at the rate of 15 to 20 pounds per acre, with a broadcaster or grass seeder. Cover with a brush or light harrow. Young plants are quite tender, and the land must be free from weeds until they become established. Lb., 45c; 5 lbs., \$2.00; 10 lbs., \$3.50. See page 20 for Nitragin for Inoculating.

Grimm Alfalfa

BAYER DUST

DRY TREATMENT FOR SEED CORN

Is just the same as Uspulun, made by the same people, only it is a dust treatment instead of a liquid treatment. The seed treatment with Bayer Dust is really simpler than the liquid treatment, and the same results can be had. It is necessary only to mix Bayer Dust thoroughly with the seed using 2 to 3 ounces to each bushel. A simple machine can be easily made on the farm. Take a barrel, or better, a tight, solid built box with a gas pipe running through it as an axle, set this up on some uprights and you are all ready to go to work. Both ends of the barrel or box should be closed and an opening for the insertion of seed and dust be cut in the side, fitted with a cover that can be fastened tight. Larger yields can be had from smaller fields if you treat your seed corn to control diseases. We are offering Bayer Dust this year in one-pound tins at \$1.75 per pound, f. o. b. Sedalia, Mo. Must go by express.

If You Inoculate with Nitragin The Original Soil Inoculator

Archias' Berry Plants for Quick Returns

Hardy, Vigorous, Thrifty Plants That Pay Big Profits

Latham Raspberry

(Minnesota No. 4).

Yields Twice as Much as Other Red Raspberries

Here is a new red Raspberry that was originated in Minnesota and acclaimed for its hardiness in that state. During the past few years its merits have spread with its planting throughout the middle and eastern states. The high yielding ability of the Latham is due largely to its resistance to Mosaic and other Red Raspberry diseases; wherever tried, reports have been most favorable. It possesses the hardiness of "King" and produces very strong, vigorous, thornless canes; very productive. Berries are large, of highest quality, ripen evenly and hold up well throughout the season. The canes do not need covering even in severe locations. We have a fine stock of this splendid new variety and hope you will give it a thorough trial, as we are sure it will prove a money-maker for you, especially in a season when other standard varieties freeze out. Each, 15c; 3 for 40c; 12 for \$1.00; 25 for \$1.65; 100 for \$4.50, postpaid.

Glass Cloth

In many ways superior to glass for hotbeds, cold frames, chicken houses, scratch sheds, for covering window openings and for making a screen porch into a sun parlor.

It is much cheaper than glass. Lighter to handle. Does not break. Is almost as transparent as glass. Does not burn the plants in a hotbed and lets through more of the beneficial ultra-violet rays than does glass.

The cloth is a medium weight white muslin treated with a special preparation which makes it water-proof, translucent, weather-proof and long lived. It comes in one width only, 36 inches or a trifle less, and in standard size bolt of 15 yards. Can also be had in 6-yard and 10-yard bolts. Try to order these regular sizes if possible.

Special Prices—Glass Cloth

- 15-yard bolt (135 sq. feet) postpaid\$5.00
- 10-yard bolt (90 sq. feet) postpaid 3.50
- 6-yard bolt (64 feet) postpaid 2.25
- This figures out less than 4c per square foot in full bolts, or one-fourth to one-eighth the cost of glass.

If You Have Not Had Successful Fruit Crops—Try Spraying

Trees cannot thrive when infested with sucking, biting and chewing insects. They cannot produce high grade fruit—nor much of any kind. Systematic spraying will not only increase the quantity of your fruit crop, but will wonderfully improve the quality as well. Thousands of fruit growers owe their present success to a good spray pump—after they had practically given up the hope of ever getting a good crop again.
